

SEMINAR ON SCIENCE PUBLISHING

"Why Was My Paper Rejected?: Publishing Tips from a Journal Editor"

Dr. David Peralta
Editor-in-Chief
ChemMedChem

Have you ever wondered why your last journal submission was directly rejected? Or how editors pick referees and conduct peer review? Or what exactly do editors and publishing houses do?

In this talk, Dr. David Peralta, Editor-in-Chief of *ChemMedChem* (a Wiley-VCH and ChemPubSoc Europe journal on medicinal chemistry and nanomedicine) talks from his experience as a scientific editor and opens up the "black box" of science publishing. David will provide tips on how to optimize your submissions for a better chance at peer review, as well as discuss how one can deal with rejected papers.

Masters and PhD students, junior faculty, and professors working in the natural/physical sciences, particularly chemistry, biology, biotech, pharmacology, environmental science, physics, and materials sciences, are invited to this seminar to get tips on how to improve their manuscripts and chances of getting published. This is also a great opportunity to learn about editorial work, which is an excellent career option for those with graduate degrees in the sciences.
