

Short CV

Dr. Andrej Perdih is Senior Research Associate at the Theory Department of the National Institute of Chemistry in Ljubljana, Slovenia, and external Associate Professor at the Faculty of Pharmacy, University of Ljubljana. He received his PhD in Medicinal Chemistry at the University of Ljubljana and then completed postdoctoral stays at the Freie Universität Berlin in Germany, and the University of Michigan in the USA. His main research areas are computational biochemistry and computer-aided molecular design. He actively collaborates with several research teams, both in Slovenia and internationally. He has successfully led and participated in several research and bilateral projects that have resulted in about 70 published scientific articles.
